2 DESCRIPTION OF THE ACTION PROGRAMME

2.1 PRIORITIES SELECTED UNDER THIS ACTION PROGRAMME

- **Rationale for the selection of the specific priorities under this programme:**

Strengthening civil society is a core part of the political criteria for accession. As such civil society also corresponds to essential and closely interlinked elements of the enlargement strategy and is regularly monitored in the Progress Report. Indeed, a more dynamic civil society can contribute to the accession process and sustain public support for accession.

The Multi Country Indicative Strategy Paper 2014-2020² (MCSP) endorses the approach proposed in the Communication *The roots of democracy and sustainable development: Europe's engagement with Civil Society in external relations*³ as well as in the *EU Human Rights Guidelines on Freedom of Expression Online and Offline* and considers the horizontal support to civil society and media as one of the priorities to improve democracy and rule of law.

The priorities of the present document for the period 2016-2017 are largely inspired by two sets of guidelines prepared in coordination with EU Delegations: "*EU Guidelines for support to civil society in enlargement countries, 2014-2020*" and "*EU Guidelines for support to media freedom and media integrity in enlargement countries, 2014-2020*". The guidelines translate the objectives as indicated in the MCSP and in the annual Enlargement package into a concrete "results' framework" containing the outcomes to be achieved in the next financing period as well as the indicators to monitor them. The measurement of indicators will provide information for the elaboration of the annual IPA II beneficiaries' progress reports and for the programming of IPA support.

The overall objective of the 2016-2017 programme is to strengthen participatory democracies and the EU integration process in the Western Balkans and Turkey by empowering civil society to actively take part in decision-making and by stimulating an enabling legal and financial environment for civil society and pluralistic media.

To achieve the priorities formulated in the strategic documents for the period 2016-2017 the Commission will continue its efforts to consolidate regional networks and associations of civil society organisations (CSOs)⁴ and to increase their accountability as well as in building the institutional mechanisms for cooperation between governments and civil society and introducing transparent procedures for financing CSOs from public budgets.

² C(2014) 4293, 30.06.2014

³ COM(2012) 492 final

⁴ As defined in the Regulation (EU) No 233/2014 of the European Parliament and of the Council of 11 March 2014 establishing a financing instrument for development cooperation for the period 2014-2020 "The EU considers CSOs as non-State, non-profit making actors operating on an independent and accountable basis. They include: non-governmental organisations, organisations representing indigenous peoples, organisations representing national and/or ethnic minorities, diaspora organisations, migrants' organisations in partner countries, local traders' associations and citizens' groups, cooperatives, employers' associations and trade unions (social partners), organisations representing economic and social interests, organisations fighting corruption and fraud and promoting good governance, civil rights organisations and organisations combating discrimination, local organisations (including networks) involved in decentralised regional cooperation and integration, consumer organisations, women's and youth organisations, environmental, teaching, cultural, research and scientific organisations, universities, churches and religious associations and communities, philosophical and non-confessional organisations, the media and any non-governmental associations and independent foundations, including independent political foundations [...]".

With regard to freedom of expression, in an effort to have a thorough understanding of the systemic nature of the challenges in the Western Balkans and Turkey and to elaborate adequate policy responses to it, the Commission organised three Speak-up! Conferences (2011, 2013 and 2015) involving stakeholders from the media community, CSOs and decision makers. These events and the following conclusions have become important reference points in addressing the issues of media freedom and integrity in the context of the enlargement policy and the Guidelines for media offer a long term assistance approach to this end.

- **Overview of past and on-going EU, other donors' and/or IPA II beneficiaries' actions in the relevant sectors:**

The programme builds on the lessons learned from IPA I, which demonstrated that progress towards meeting EU membership criteria is best achieved by a mix of measures planned both at national and at regional level. In order to follow up on the lessons learned of previous financial assistance, the Commission introduced the civil society and media guidelines to facilitate the translation of the political priorities into concrete objectives and results and to improve consistency between the interventions planned at regional and national level. This major effort is thoroughly reflected in the present document and offers a solid ground to future monitoring of the contribution of the EU to civil society development in the Western Balkans and Turkey. More particularly a baseline assessment was conducted at the beginning of 2014 for the civil society guidelines and then updated in 2015 while the baseline assessment for the media guidelines was realized in summer 2015.

The Civil Society Facility (CSF) was introduced for the first time in 2008 to support civil society financially and technically and proved to be a powerful means to strengthen participatory democracies and freedom of media. The CSF comprises both national and multi-beneficiary initiatives which are programmed in a coordinated manner. The CSF is therefore a single facility for the Western Balkans and Turkey.

The programme allocations for 2016-2017 are EUR 87.32 million (EU contribution) envisaging an increase of 27% compared to 2014-2015 and comprises one decision per year implemented directly by DG NEAR (the multi-country envelope) and by each EU Delegation for each of the national envelopes. 68.8% of the 2016-2017 programme funds will support CSOs directly (action grants, operating grants, low value grants, resource centres, people-to-people actions), 12.4% will benefit media and media CSOs, 11.6% will be allocated for technical assistance to governments and CSOs, 6.2% to international organisations and 1% for support measures.

In accordance with the MCSP, assistance to civil society and media will be delivered under the headings "Horizontal support to sector policies and reforms".

The CSF and media programme 2016-2017 includes the following actions:

<i>Action number and title</i>	<i>EU contribution 2016 (million EUR)</i>	<i>EU contribution 2017 (million EUR)</i>

2.2 DESCRIPTION AND IMPLEMENTATION OF THE ACTIONS

Priority 1	<i>Horizontal support to sector policies and reforms</i>	<i>Amount EU EUR: 87.32 million</i>
Action 1	<i>Civil Society Facility and media multi-country 2016-2017</i>	<i>EU 2016: EUR 23.5 million EU 2017: EUR 15 million</i>

(1) Description of the Action, objective, expected results and key performance indicators

Description of the action and objective

This action aims at strengthening participatory democracies and the EU integration process in the Western Balkans and Turkey by improving the legal, policy and financial environment for civil society and pluralistic media, by building the capacities of CSOs and media organizations as well as enhancing the mechanisms of cooperation between CSOs and public authorities. In particular, the multi-country action will strengthen regional networks in various fields.

The action is structured in five main components:

1. Support to the capacities of CSOs at regional level;
2. Media freedom and integrity: support to Public Service Media (PSM);
3. Strengthening local democracy through reinforced partnership between local governments and CSOs;
4. Fighting violence against and discrimination of women and girls;
5. Civic monitoring of the Regional Housing Programme (RHP).

Expected results

- CSOs regularly network within and outside the beneficiary with an increased impact in advocacy;
- Public institutions recognise the importance of CSOs in improving good governance through inclusion of CSOs in decision-making processes;
- The activities of CSOs are guided by strategic long-term planning and have a diverse funding base;
- Professional PSM ensures content pluralism in an independent and accountable manner;
- Capacity of CSOs and local governments in implementation of municipal grant schemes and delivering of quality projects is strengthened;
- Improved enabling environment for eliminating violence against women and other forms of discrimination;
- RHP sub-projects are realized in accordance with actual housing needs and socio-economic status of RHP beneficiaries.

Key performance indicators

- Quality assessment of existing legislation and policy framework;
- Quality of structures and mechanisms in place for cooperation between CSOs/media and public Institutions;
- External perception of importance and impact of CSO activities and of CSO transparency and accountability;
- Number of final beneficiaries of the RHP benefited.

(2) Assumptions and conditions

A main precondition for the achievement of the objective of the action is that the development of a civil society culture in the region requires political stability and a favourable environment for the enhancement of CSOs and civil society dialogue. Consequently, partner CSOs and/or authorities from the Western Balkans and Turkey should be willing to establish and improve their exchange of information. Part of the assistance efforts will fail if the authorities implement policies and actions that are counterproductive to achieving a civil society culture. It is therefore of paramount importance that the EU and other donors keep a close eye on this and take appropriate measures if necessary. Failure to comply with the requirements set out above may lead to a partial recovery of funds under this programme and/or the re-allocation of future funding.

(3) Essential elements of the action

Procurement:

- a) the **global** budgetary envelope reserved for procurement: EUR 6.5 million (EUR 1.5 million under IPA 2016, and EUR 5 million under IPA 2017).

The subsequent grant will be provided as financial support to the operating costs of the Regional Association".

This will be the last year of renewal of the operating grants.

a) Objectives and foreseen results:

The fourth renewal of the operating grants will contribute to the achievement of the specific objective of the action, namely to enhance the capacities of CSOs to be effective and accountable independent actors.

The 10 beneficiaries of the previous operating grants (awarded following the call for proposals EA/136034 and the subsequent renewals) will be invited to submit the detailed Work Programme for 2018, which has to comply with the objectives and requirements set by this Action.

All beneficiaries as outlined below under point c) will be awarded direct grants in accordance with Article 190 (1) f) of the Regulations on the rules of application of Regulation (EU, Euratom) n. 966/2012 (RAP).

c) the name of the beneficiary:

- UNDP will implement the action aimed at strengthening local democracy and service delivery, involving international and local organizations (Component 3). Moreover, 60% of the funds will be implemented by CSOs and local authorities through sub-granting from UNDP in each IPA II beneficiary;
- To strengthen reconciliation and improve the housing conditions for refugees at local, national and regional level, component 5 will be implemented by the Centre for regionalism on behalf of the IGMAN Initiative, a non-political network of CSOs from the Dayton countries (i.e. Bosnia and Herzegovina, Croatia, Montenegro and Serbia). PRIORITY 1		
Action 2	<i>Civil Society Facility and media Albania 2016-2017</i>	<i>EU 2016: EUR 4 million EU 2017: EUR 5 million</i>

(1) Description of the Action, objective, expected results and key performance indicators

Description of the action and objective

The main objectives of this action are to strengthen the cross-sector cooperation between the Government and civil society and to develop CSO capacities.

Support will be provided to CSOs to take part to the policy dialogue and play their role of lobbying, advocacy and monitoring the implementation of reforms in sectors which are essential in the accession process, such as rule of law, fight against corruption, freedom of expression and social inclusion. This is expected to provide a more solid base for the proper implementation of the EU sector budget support.

A second phase of a Technical Assistance project to the Albanian Government is also included to complete the improvement of the legal framework for CSO work. This is expected to secure a stronger base for the independence and future sustainability of the CSOs.

Expected results

1. Public institutions recognise the importance of CSOs in improving good governance through CSO inclusion in decision-making processes;
2. Easy-to-meet financial rules for CSO are put in place;
3. Improved capacities of CSOs (internal governance structures, strategic long-term organisational planning, fund-raising activities);
4. Regular dialogue within the media community and with the authorities is established;
5. Increased professionalism of the Public Service Broadcaster.

Key performance indicators

- Percentage of laws/bylaws, strategies and policy reforms, per sector, effectively consulted with and monitored by CSOs;
- Quality of structures and mechanisms in place for dialogue and cooperation between CSOs and public institutions;
- CSOs' perception of the ease and effectiveness of financial rules and reporting requirements;
- Increase of professional and labour standards for journalists.

(2) Assumptions and conditions

A primary condition for the proper advancement of the programme is the setting up of the National Council for Civil Society. The relevant law has been approved by the Parliament at the end of 2015 and it is expected to be implemented in the next future with the selection and appointment of the representative from both governmental and

non-governmental sides. This would provide a solid base for organizing the participation of CSOs in the different bodies where strategies are defined and monitored.

A binding condition for the release of the share of funding targeting the Albania Government is the satisfactory solution of the problems affecting VAT reimbursement on EU grants to CSOs. Current legal base exists but it is not regularly applied and a specific commitment of the government is needed for the application of the existing rules throughout all the public administration bodies both at central and local level.

Failure to comply with the requirements set out above may lead to a partial recovery of funds under this programme and/or the re-allocation of future funding.

(3) Essential elements of the action

Action 4	<i>Civil Society Facility and media the former Yugoslav Republic of Macedonia 2016-2017</i>	<i>EU 2016: EUR 2.65 million EU 2017: EUR 3.65 million</i>

(1) Description of the Action, objective, expected results and key performance indicators

Description of the action and objective

The action aims at supporting civil society in the country, in line with the EU guidelines to support civil society and media freedom. Firstly, it addresses strengthening of the civil society as actor through grants and support to National Resource Centre. Secondly, it supports work of organisations in key reforms identified in recent European Commission policy documents (freedom of expression, fight against corruption, Roma) as well as civil society networking mechanism. Thirdly, it provides for supporting measures to the calls for proposals.

Expected results

- National and local authorities adopted enabling policies for grass-root organisations;
- Public financial support to CSOs is provided in a transparent and accountable manner;
- Media outlets voluntarily adhere to principles of transparency. Professional associations of media owners/publishers established;
- Improved conditions for quality investigative journalism;
- Public institutions collaborate with CSOs in the implementation and monitoring of public policies;
- CSOs regularly network within and outside the beneficiary for increased impact in advocacy.

Key performance indicators

- Funding mechanisms for CSO's further strengthened;
- Mechanisms for permanent dialogue with civil society are operational;
- Implementation of EU standards in the area of freedom of expression and opinion;
- Share of CSOs that monitor and evaluate the implementation of their strategies and make this information publicly available/accessible;
- Number of CSOs which take part in monitoring policies, EU and other donor funding and negotiation process.

(2) Assumptions and conditions

The development of a civil society culture in the region requires political stability and a favourable environment for the enhancement of CSOs and civil society dialogue. Consequently, CSOs, governments, media and other stakeholders should work together to establish alliances and coalitions to help strengthen advocacy, etc. These efforts will fail if the authorities implement policies and actions that are counterproductive to achieving a civil society culture. The main risks involve horizontal support provided by bodies or institutions without a sufficiently clear mandate and experience, or support that it is not tailored clearly to the national needs and priorities. These risks are addressed through a rigorous selection mechanism privileging long standing partnerships which have already demonstrated a clear added value. Another element is to ensure that the horizontal support is based on a clear national needs assessment done in close collaboration with both the IPA II beneficiaries and the EU Delegations and geographical units

(3) Essential elements of the action

The applicants will need to have experience and know-how in a particular area given that the future Resource Centre will have to take over and replace the services offered by the TACSO national office. More precisely, the Resource Centre is supposed to provide information, capacity-building and trainings for local and national CSOs in order to enable them to become capable, transparent and accountable in the country. The requirement for such technical expertise and management capacity is expected to result in a limited number of proposals submitted.

PRIORITY 1		
Action 6	<i>Civil Society Facility and media Montenegro 2016-2017</i>	<i>EU 2016: EUR 2.5 million EU 2017: EUR 1.5 million</i>

(1) Description of the Action, objective, expected results and key performance indicators

Description of the action and objective

This action will improve the level and quality of participation of CSOs throughout the Montenegrin policy-making processes. This will be achieved through the promotion of an enabling environment that is conducive to civil society activities and building their capacity to be credible, effective, accountable and independent actors.

The action shall contribute to strengthening civil society organisations' long-term strategic development and fund-raising abilities outside the framework of EU accession funding. The intervention will also improve the cooperation and dialogue between the civil society and the government, as well as reinforce civic participation in public policy processes. It will also give incentives toward fostering stable and transparent procedures in the area of decentralised management and give rise to improved conducive financial environment in the area of public funding.

Expected results

1. CSOs and media are recognised by the government and citizens as reliable partners in improving good governance, rule of law, human rights, environmental affairs, policy-making procedures and social service implementation;
2. CSOs strengthened their strategic organisational development, as well as their long-term financial and institutional sustainability;
3. Sufficient public funding to CSOs is available and provided in a regular, transparent, accountable and fair manner;
4. A foundation-like entity is established to administer the decentralised management of the CSF;
5. Improved quality and independence of information delivered by traditional and social media.

Key performance indicators

- Number, size and duration of public grants to CSOs across all sectors;
- External perception of importance of CSO activities;
- Assessment of effective implementation of NGO law and by-laws governing public funding;
- Quality of structures and mechanisms in place for dialogue and cooperation between CSOs and public institutions.

(2) Assumptions and conditions

A vital risk to this programme is a lack of pro-active collaboration and passive behaviour amongst the sector stakeholders, which would inevitably lead to partial or complete failure of envisaged capacity development gains. With regard to Government authorities, this implies continued political will and progress on the various related strategies and policies. With regard to civil society organisation, this implies continued will to strengthen capacities in the various sectors of intervention. Collectively, all stakeholders need to establish, within their own policy fields and sectors, a spirit of cooperation where they recognise the advantages of mutually benefiting relationships. The programme in subject is about achieving this objective and although all envisaged activities will support the process, pro-active efforts from all stakeholders are vital to a successful implementation.

The drafting of both documents is not yet finalized: At the moment, the creation of the Strategy for CSO development and its

PRIORITY 1		
Action 8	<i>Civil Society Facility and media Turkey 2016-17</i>	<i>EU 2016: EUR 10 million EU 2017: EUR 0 million</i>

(1) Description of the Action, objective, expected results and key performance indicators

Description of the action and objective

The Civil Society Facility Turkey ("Sivil Düşün III" including support to the Resource Centre) aims to improve the environment for active citizenship and to strengthen the capacity of organised active citizens. The action will contribute to an improvement in the freedom of expression, peaceful assembly and association; to an enhanced capacity of civil society organisations (CSOs) to benefit from public and private funding mechanisms; to a more effective mobilisation of support from citizens and decision-makers by organised citizens; and to more effective civil society networks, information sharing, and collaboration.

The action proposes innovative and flexible tools to answer the needs of civil society. It ensures high visibility for the EU and shows its repeated commitment to support civil society, including at a grass-root level.

Expected results

1. Freedoms of expression, peaceful assembly and association are enjoyed fully and effectively, especially by rights-based CSOs, networks & platforms and activists, in particular those working on what are today more politically sensitive matters;
2. Improved capacity of CSOs to benefit from public and private funding mechanisms;
3. Organised citizens are more often supported by citizens and decision-makers and more effectively use this support;
4. Organised citizens network, share information and collaborate more effectively.

Key performance indicators

- Law on associations and law on collecting aid are amended addressing existing obstacles;
- Quality assessment of existing legislation and policy framework;
- Number of employees in CSO (permanent and part-time);
- Quality of structures and mechanisms in place for dialogue and cooperation between CSOs and public institutions;
- Share of CSOs taking part in local, national, regional and international networks.

(2) Assumptions and conditions

All necessary conditions for the successful implementation of the proposed action are already in place.

(3) Essential elements of the action (for direct management)

Procurement:

- a) the global budgetary envelope reserved for procurement: *EUR 5 million (IPA 2016)*
- b) the indicative number and type of contracts: One (1) service contract contracted via negotiated procedure as foreseen under the service tender with reference EuropeAid/136900/DH/SER/TR " Civil Society Facility (Sivil Düşün II), as per item 10 of the Contract Notice under reference : "The Contracting Authority may, at its own discretion, extend the project in duration and/or scope subject to the availability of funding up to a maximum not exceeding the length and value of the initial contract . Any extension of the contract would be subject to satisfactory performance by the Contractor". In case the winning consortium is not delivering as per contract, the EU reserves its right to disregard the negotiated procedure and re-launch the service tender.
- c) indicative timeframe for launching the procurement procedure: Following an assessment of the contract signed under EuropeAid/136900/DH/SER/TR, the tender could be launched during Q1 2017, with contract signature during the Q4 2017. Alternatively, if the Contracting Authority opts for a contract renewal (possibility foreseen at point 10 of the Contract Notice, see above), a simple negotiated procedure should be launched during Q2 2017 with contract signature during Q4 2017.

Grant – Call for proposals: Networks and Platforms

a) Objectives and foreseen results:

The objective of this call for proposals will be to contribute to the strengthening of capacities of existing or new national, regional (in the sense of regions within Turkey), local and/or thematic platforms and networks of Civil Society Organisations (CSOs) to give citizens a voice and influence public sector reform processes through their activities.

Though the outcome of the call will contribute to all four results, it will mainly concentrate on Result 4. This grant scheme is designed to support rights-based activities and rights-based work of networks and platforms. It will give priority to more "politically sensitive" issues (e.g. minority rights, gender, cultural rights, freedom of media and expression etc.). An effort will be made to encourage a wide geographical coverage, as well as different scopes and topics to be considered. As a result, it is expected that the voice of CSOs organised as networks and platforms, will be reinforced in different fields, hence strengthening their influence in policy-making at local, regional and national level.

b) The essential eligibility criteria:

For the applicants:

To be considered eligible, applicants must:

- be legal persons and
- be non-profit-making and
- be civil society organisations established in a Member State of the European Union or in a Beneficiary under the Instrument for Pre-accession Assistance (i.e. including Turkey) or in a member state of the European Economic Area (EEA) or in a Beneficiary under the European Neighbourhood and Partnership Instrument (ENPI).

For the actions: actions will have to take place in Turkey, except for specific, occasional actions as long as they contribute to the achievement of the objectives of the call.

- c) The essential selection criteria are financial and operational capacity of the applicant.
- d) The essential award criteria are relevance, effectiveness and feasibility, sustainability and cost-effectiveness of the action.
- e) Maximum rate of EU co-financing: the maximum possible rate of EU financing will be 100% of the total cost of the action.

Full financing of the action is essential for the action to be carried out because of a multi-annual approach that moves away from the traditional project co-financing approach. One of the main reasons is that coordination of a network/platform requires an organisation/some organisations of the group take(s) over the secretary and coordination tasks. However, it/they should not bare the financial burden related to these additional tasks that go beyond pure content related activities. Hence, the grants under this call for proposals will be financed in full as made possible within Art. 192 of the Financial Regulation.

- f) Indicative amount of the call: EUR 2 million (IPA 2016)
- g) Indicative date for launch of the call for proposals: Q4 2016

Grant - Direct grant award: Support to the Resource Centre

a) Objectives and foreseen results:

The objective of the support to the Resource Centre is to increase the capacity of CSOs, to promote freedom of association in Turkey, to contribute to the monitoring of the EU Guidelines to support civil society in Turkey and more generally to facilitate the civil society's contribution to decision-making processes and in particular those linked to the EU accession process.

b) Justification for the use of an exception to calls for proposals:

As per Article 190 (1) of the RAP paragraph c), may be awarded a grant without a call for proposals to bodies with a de jure or de facto monopoly, duly substantiated in the award decision.

To-date STGM is the only organisation capable of effectively operating in the field of activity and geographical area to which the grant relates by virtue of consideration of the following facts:

STGM has specialized exclusively in providing support to civil society organisations and it is still to date the only civil society actor capable of effectively delivering tailor-made and help-desk support to grassroots CSOs all over the country, from a rights-based perspective.

STGM is also widely recognized as having a leading role regarding capacity building of CSOs at national level. This technical expertise has proven to be crucial, particularly taking into consideration that the current legal framework regulating CSO operations in Turkey is complex, restrictive, and very bureaucratic. Especially regulations regarding state inspections on CSOs are mainly focused on limitations, defining penalties and sanctions that do not seem to meet the principle of proportionality.

Despite legal limitations related to the creation of networks and platforms in Turkey, STGM is the only organisation that manages to operate as a quasi NGO umbrella organisation, giving it the strategic advantage of covering a wide range of policy sectors (the founding members (and board members) of STGM are prominent representatives of

CSOs working on environment, gender, children, culture, human rights, disaster preparedness, education etc.).

It is important to underline that Turkey's current political context for CSOs, particularly for those that are right-based, is significantly different than the one in Western Balkans.

As underlined in the 2015 Progress Report, there have been growing pressures on freedom of expression, as well as increasing restrictions in the sphere of freedom of association based on security concerns and the need of combating terrorism.

c) the name of the beneficiary: The Civil Society Development Centre Association (in Turkish Sivil Toplum Geliştirme Derneği – STGM).

d) The essential selection criteria are financial and operational capacity of the applicant.

The award criteria are relevance, effectiveness and feasibility, sustainability and cost-effectiveness of the action.

e) indicative amount of the grant: EUR 3 million (IPA 2016).

f) The maximum possible rate of EU co-financing will be 100% of the total cost of the action as there are no other funding sources than the EU.

EU co-financing up to 100%: STGM will be the direct beneficiary of a grant agreement with full contractual responsibility (both financial and technical). The final beneficiaries will be civil society organisations as STGM has specialised in providing capacity-building services for CSOs. It will take over, as described in TACSO sustainability strategy, the implementation of services to CSOs that were formerly carried out by TACSO. In the current ever challenging context for civil society work, STGM, as the only civil society organisation capable of carrying out Resource Centre activities in an impartial manner in Turkey at all levels and geographical scopes, will be preserved from uncertainties and legal environment related risks thanks to a financing in full. That is how and why STGM will be able to implement those specific activities related to its CSO support role in a flexible and timely way. Art 192 of the financial regulations that allows for financing in full will be applied.
