2 DESCRIPTION OF THE ACTION PROGRAMME

The 2014-2020 CBC programme Bosnia and Herzegovina - Montenegro was approved by Commission Implementing Decision C(2014)9351 of 10 December 2014. The adopted 2014-2020 programme constitutes the CBC cooperation strategy for the border region, setting out among others the list of geographical eligible areas, the area context, the programme thematic priorities and the indicative budget allocations for the 7 years period.

The 2014-2020 CBC programme also serves as a reference for the adoption of the CBC action programmes. The 2015-2017 CBC action programme aims at providing assistance for cross-border cooperation in the thematic areas spelled out in the 2014-2020 programme (as indicated in section 2.2).

- List of geographical eligible areas

The following 56 municipalities in Bosnia and Herzegovina and 14 municipalities in Montenegro are eligible under this programme:

- Cross-border cooperation (CBC) eligible area context

The situation analysis of this area conducted for the preparation of this programme pointed out the following key challenges and opportunities to be addressed and supported through cross-border cooperation:

Lack of employment opportunities:

Lack of employment opportunities is one of the major threats in the programme area. It does affect the standard of living of the majority of the population and is a crucial cause of migration flows. Short-term improvement of this situation is unlikely and negative impacts might even worsen especially for vulnerable groups and rural population.

Rich natural resources threatened by pollution and natural disasters

While rich in natural resources, the programme area is also considered vulnerable and exposed to several risks ranging from pollution to natural disasters. Due to the region's high vulnerability to climate change, risk of flooding and forest fires have increased in the last decade. The climate change will also put an additional stress on hydropower production, and adaptation measures will have to take this into consideration. The programme territory's
potential for renewable energy sources, especially in sustainable biomass, has not been tapped in.

Tourism can contribute to economic development

Adequate use and promotion of natural resources and cultural heritage can contribute to opening the area to sustainable tourism as a way for economic growth.

- Overview of past and on-going CBC experience including lessons learned

Key recommendations from interim evaluations and audits on the 2007-2013 CBC programmes have been taken on board in the development of this programme. Thus, the 2014-2020 CBC programmes are more focused as regards the number of thematic priorities addressed, which will help to achieve better results and increased impact. Additionally the implementation of the CBC programmes has been simplified mainly by having a single contracting authority and a single financial envelope per programme. Close cooperation between the two countries during every step of the implementation of the programme has been essential and will need to be ensured also for this CBC programme with one single contracting authority. Furthermore, experience has shown that potential applicants need support to identify possible project partners on the other side of the border and in the development of high-quality proposals. This support will be continued to be provided.

Moreover the Programme should build on the precise features and actions defined by both countries, Bosnia and Herzegovina and Montenegro, in the framework of the EU Adriatic and Ionian macro-regional Strategy (COM(2014) 357 on the EU Strategy for the Adriatic and Ionian Region), as well as, the EU Danube macro-regional Strategy (COM(2010) 715 on the EU Strategy for the Danube Region)
